

ABODO

Carefully Crafted Timber

MPavilion – Melbourne, Australia

Barcelona-based architect
Carme Pinós of Estudio Carme Pinós

Project & Product Overview

Set in the Royal Botanic Gardens in Melbourne, the stunning new MPavilion showcases the striking lines of Vulcan eco-timber screening.

It's the fifth in the ongoing series of temporary structures in the gardens, this time designed by Barcelona-based architect Carme Pinós of Estudio Carme Pinós.

Vulcan Screening was used for the roof and the walls, blending at deceptively clever angles to make the legs and roof.

Vulcan is made from sustainably sourced, FSC-certified timber – and is a fitting choice for a structure that celebrates nature, people and beauty for a lifetime.
